

The 2nd International Workshop on

We are pleased to invite you to The second International Workshop on Kansei to be held in Fukuoka, Japan, on March 7 and 8, 2008. This workshop focuses on 'Kansei', the perceptual and cognitive abilities to intuitively/deductively feel, comprehend, and appreciate the appearance of an object, scene, and consequently, the world around us. In dealing with this topic, our aim is to bring together scientists from various fields of research (Psychology, the Arts, Physiology, Neuroscience, Linguistics, Musicology, Architectonics, Information Science, and so on). All participants who wish to present their researches are required to submit a presentation title, presenter's name(s) and affiliations(s), short abstract (less than 300 words), full contact address of presenter(s), and preference for presentation style (spoken or poster presentation) via e-mail to tkawabe@psycho.hes.kyushu-u.ac.jp, Group for Research and Communication on Kansei. Based on peer-review results, we will invite accepted presenters to write an extended abstract for the Proceedings of the Second International Workshop on Kansei. For details, please visit the following URL:
http://psycho.hes.kyushu-u.ac.jp/~lab_miura/Kansei/ws2008/index.html
